AIRPORT

Staron, a smart material that is easy to maintain and repair

Staron solid surfaces are durable and impact resistant. In case of cracks or damage, you can easily restore the surface. Although Staron is not physically affected by the impact of the environment, over time, there may be slight changes to the gloss surface. To recover the original feel of the surface, you can easily apply light sanding and polish. High traffic areas like airports are ideal locations for Staron solid surface where quick fixes can keep the space looking new for an extended period of time.
